### Description

Water-repellent, oiled full-grain leather upper (2.0–2.2 mm thick) offering excellent resistance to abrasion, tearing, and punctures for enhanced durability.

Synthetic fur lining designed to keep feet warm in cold outdoor conditions.

Injected dual-density polyurethane (PU2D) outsole with an open-lug tread for improved slip resistance and better liquid drainage, ideal for outdoor work.

Ultra-lightweight, ergonomic polycarbonate toe cap, chemically inert, elastic (regains its shape after compression), and thermally insulating (resistant to temperature variations between -10°C and +40°C).

High-tenacity textile puncture-resistant insert, ultra-light, highly flexible, thermally insulating, covering 100% of the foot surface.

Abrasion-resistant toe guard for extended product lifespan.

Raised heel for enhanced safety, particularly when climbing ladders / Weight 800g in size 42.

### Instructions for use

S3 safety footwear is designed for smooth and oily industrial floors, suitable for both indoor and outdoor use. Provides protection against impacts up to 200 Joules and compression up to 1500 daN. Features a closed heel, antistatic properties, energy absorption in the heel area, water-penetration and absorption-resistant upper, puncture-resistant midsole, and lugged outsole for improved grip.

### Limitations of Use

The GISS warranty applies only to footwear that is in good condition and used without modifications or improper use. Shoes must be worn with their original removable insole, which has been tested with the product, or replaced only with an equivalent GISS insole. The footwear does not contain any known substances that could cause allergic reactions in sensitive individuals.

### Storage, Cleaning, and Maintenance Instructions

Store the footwear in its original packaging, protected from light and moisture. After each use, leave the shoes unpacked in a well-ventilated area, away from any heat sources. To remove dirt and dust, use a non-metallic brush. For stains, clean with damp cloth and soap if necessary.

### Certification

EN ISO 20345 : 2011 S3 SRC CI / EN ISO 20345 : 2022 S3L CI SR FO

### Packaging

Individual box – cartons of 5 boxes
