INTRODUCTION

From standard aluminum oxide bench wheels to premium ceramic abrasive surface grinding wheels, Norton offers high performance abrasive solutions that can maximise productivity in virtually all industrial applications.

The extensive product range is designed to meet all your precision grinding and roughing application needs, with all the most appropriate abrasive specifications, including grinding wheels, segments, mounted points, dressing sticks and sharpening stones.

Norton, the industry's most comprehensive Bonded abrasive product line.

ABRASIVE TYPES

CERAMIC ALUMINIUM OXIDE

Norton SG, Norton Quantum are patented ceramic forms of aluminium oxide that are harder and sharper than conventional abrasive grains. The ceramic grain has a unique microcrystalline structure and when used in a grinding operation this microstructure becomes self-sharpening. This leads to a reduction in the need for wheel dressing and a considerably cooler cutting action.

ALUMINIUM OXIDE

Generally recommended for grinding materials of high tensile strength, such as stainless steel and tool steels, but it can also be used on some high tensile aluminium and bronze alloys. It is manufactured in varying qualities.

SILICON CARBIDE

Harder than aluminium oxide with a very sharp abrasive grain shape. It is recommended for grinding relatively soft materials such as aluminium or cast iron as well as grinding extremely hard materials such as cemented carbide.

ZIRCONIA ALUMINA

For use in rough grinding applications where high stock removal is required. Associated with high tech resin bonds.

GRIT SIZE

The number in the grinding wheel, marking designating grit size, represents the approximate number of openings per linear inch in the final screen size used to size the grain. The following rules should be followed:

USE COARSE GRIT

- For soft, ductile, stringy materials such as soft steel or aluminium
- For rapid stock removal
- Where finish is not important
- For large areas of contact.

USE FINE GRIT

- For hard, brittle materials such as hard tool steels, cemented carbides & glass
- For fine finishes
- For small areas of contact
- For holding small corner radii.

WHEEL GRADE

The grade indicates the relative holding power of the bond, which holds abrasive grains in a wheel. This is represented in the specification by letters running through the alphabet from softest to hardest. The following rules should be followed with regard to grade:

USE SOFT GRADE

- For hard materials such as hard tool steels & carbides
- For large areas of contact
- For rapid stock removal.

USE HARD GRADE

- For soft materials
- For small or narrow areas on contact
- For longer wheel life.

BOND TYPES-VITRIFIED

Vitrified bonds are the most common precision grinding bond. Porosity and strength of the wheels made with this bond give high stock removal along with their rigidity helping to attain high precision. Not affected by water, acid, oils or ordinary temperature variations. The most common vitrified bonds are:

VS3 / VS3P

NEW VITRIUM³ REVOLUTIONARY BOND TECHNOLOGY

The Vitrium³ bond platform features an exclusive chemistry that delivers an entirely new grain adhesion science, resulting in improved product versatility across a wide range of precision grinding applications. Provides cool cutting, precise profile, high speed, versatile across all precision grinding applications.

VS

VS is a versatile, low temperature, vitrified bond system used in most precision applications.

VX / VXP

Equivalent to VS bond, for ceramic only.

VQN / VQNP

These bonds are associated with Norton Quantum technology - a versatile technology for low, medium and high force applications.

BOND TYPES-ORGANIC

These bonds are used in two types of wheels. Firstly, wheels used on portable or fixed machines for the rapid removal of metal. Secondly, cutting-off wheels either un-reinforced or reinforced, for use on portable or fixed machines. The most common organic bonds are:

SNAGGING WHEELS & CUPS

B & B3	Foundry wheels: multi-purpose bond that gives satisfactory results on most applications
B28	Foundry wheels: high level bond suitable for most technical applications requiring high powered machines

CUTTING-OFF WHEELS

BFX	NEW Foundry X bond technology designed to increase cut rate and wheel life in all cut-off applications on a wide range of tough materials
BF1	Specific bond ensuring the best quality of cut in dry or wet conditions
BF3	New generation bond assuring the best wheel life in dry cutting operations; versatile & long wheel life. Ideal for heavy duty operations
B24	New generation bond used on silicon carbide cut-off wheels that gives the best performance & the ultimate cut quality on non-ferrous metals in wet conditions
B25	Standard multi-purpose bond that offers durability & freeness of cut in a wide variety of materials & applications. Can also be used in wet cutting on softer grades
B26	New generation bond used on aluminium oxide cut-off wheels that gives the best performance & the ultimate cut quality on ferrous metals in wet conditions
B65	Traditional bond gives good performance & long wheel life in dry cutting conditions

DIFFERENTIATION IN THE RANGE

Norton offers the industry's widest selection of sharpening and grinding wheels to meet every customer requirement. The range is classified into 3 tiers (Best/Better/Good) to help you choose the right product for your specific application according to the type of abrasive used.

BEST +++++
INNOVATION

Using unparalleled abrasive technology, & extremely high performance, high concentration ceramic aluminium oxide abrasive, Norton provides innovative products dedicated to improving productivity in all industrial applications

BEST +++++

High concentrations of the well renowned SG abrasive are used to supply Norton's high performance abrasive grains, 5SG & 3SG. These products meet the demands of the most discerning user giving high stock removal rates & long product life for lower operating costs

BETTER ++++

The SGB abrasive is used in the majority of Norton's Better products. SGB contains a medium concentration of SG ceramic aluminium oxide abrasive. SG is harder & sharper than conventional abrasive grains & gives excellent cutting capability on a wide variety of materials

GOOD +++

Standard aluminium oxide grains, both blended & pure, give highly durable solutions that produce good performance levels

APPLICATION GUIDE FOR PRECISION GRINDING

TOOL GRINDING

PAGE 279 TO 297

Tool grinding refers to the maintenance and repair of the cutting tools used in manufacturing operations. Wheels of all sizes and shapes are used in tool and cutter applications. Most wheels used are vitrified, in grit sizes 36 to 220, and in grades H through to N.

SAW SHARPENING

PAGE 298 TO 303

Saw sharpening refers to the maintenance and repair of saw blades. Vitrified flat wheels and cups are used in grit sizes 54 to 60. Resin treatment reinforces the wheel and helps reduce wheel face deformation.

SURFACE GRINDING

PAGE 304 TO 319

The term surface grinding is used to describe the grinding of flat surfaces in which the wheel moves past the workpiece in a flat plane, or vice versa. Surface grinding applications range can very from heavy rapid stock removal, to precision contour grinding.

EXTERNAL CYLINDRICAL GRINDING

PAGE 320 TO 327

Norton's leading technology, provides you with the best precision, formholding vitrified wheels to maximize productivity, increase grinding efficiency and improve part quality in all your external cylindrical grinding operations.

INTERNAL CYLINDRICAL GRINDING

PAGE 328 TO 332

Internal grinding refers to the grinding of bores or holes and is probably one of the most difficult types of grinding. Internal grinding applications range from very rapid stock removal to more controlled processes capable of generating sizes and concentricity measured in microns.

BENCH AND PEDESTRAL GRINDING

PAGE 333 TO 343

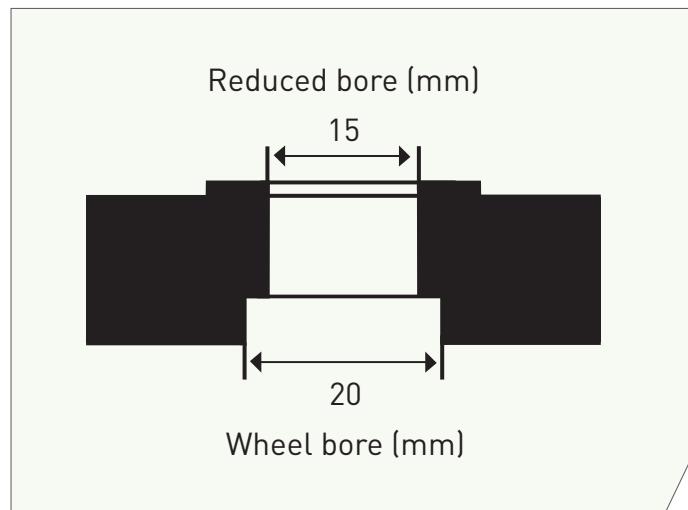

Bench and pedestal grinding application refers to offhand deburring and sharpening of parts and tools. The wheels are mounted on bench grinders or pedestal grinders and covers three types of abrasives to answer all deburring, shaping and sharpening needs: aluminum oxide for high speed tool steels and other metals, and silicon carbide for non-ferrous metals.

REDUCTION RINGS

Plastic reduction rings may be used to adapt grinding wheels to fit on various spindle sizes. These rings reduce the bore hole size, allowing the wheel to be safely mounted on a spindle with a smaller diameter.

- Reduction rings should never come in contact with the flange
- Reduction rings should not be used on wheels of thicknesses less than 6mm, or greater than 50mm
- Always use one reduction ring on each side of the wheel when the wheel is thick enough to allow correct seating
- Never use reduction rings to reduce the hole below the minimum specified in the FEPA safety code

WHEEL BORE (mm)	REDUCED TO (mm)	REDUCTION RING

TOOL GRINDING

Norton vitrified grinding wheels have set the standard for generations – leading the way with technological improvements to maximise performance and productivity for your tool and cutter grinding and sharpening operations.

For Tool Grinding, please take note of the safety instructions, about the storage and use of grinding wheels, available on page 538.

NORTON QUANTUM 5NQ / 3NQ / 2NQ

BEST +++++

FEATURES

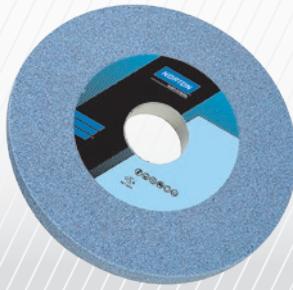

- Engineered ceramic grain shape and chemistry with new bond technology
- A perfect blend between sharpness (free cutting) and toughness (life)

BENEFITS

- Versatile in all low, medium and high force applications
- 30% to 100% higher metal removal rate
- >15% lower threshold power

SG 5SG

FEATURES

- Very high concentration of SG ceramic aluminium oxide abrasive

BENEFITS

- Ultimate cutting capability
- High removal rate & extended wheel life
- Perfect for technical applications where grinding parameters can be adjusted to optimise performance

SG 3SG

FEATURES

- High concentration of SG ceramic aluminium oxide abrasive
- Unique, self sharpening, microcrystalline structure

BENEFITS

- Very good cutting capability
- High removal rate & extended wheel life
- Suitable for very hard steels

BENEFITS

- Cool & burn free cutting
- Ideal for heat-sensitive applications with light to moderate feed rates

GOOD

86A

FEATURES

- Highly refined pink aluminium oxide abrasive
- Tougher abrasive than pure white aluminium oxide
- Contains a small portion of chromium oxide

BENEFITS

- Very versatile
- Reduced dress frequency

19A

FEATURES

- A blend of A & 38A abrasives
- Primarily used in saw grinding applications

BENEFITS

- Very versatile. For use on a wide variety of steels
- Good yield, good removal rate
- Good balance between cut rate & form holding ability

A

FEATURES

- Regular brown aluminium oxide abrasive
- Unique, self sharpening, microcrystalline structure

BENEFITS

- Very tough, suitable for grinding most types of steel & soft iron
- Good cost/performance compromise
- Hard wearing wheels for general purpose cylindrical off-hand bench & pedestal grinding applications

37C

FEATURES

- High purity black silicon carbide abrasive
- Harder & more friable than aluminium oxide abrasive

BENEFITS

- Suitable for roughing operations in coarse grit & resinoid wheels
- Ideal for grinding & sharpening applications on metal carbide & non-ferrous metals

39C

FEATURES

- Highest purity green silicon carbide abrasive
- Harder & more friable than aluminium oxide abrasive

BENEFITS

- Ideal for precision grinding & sharpening applications on metal carbide

SAW SHARPENING

Manufactured using Norton's market leading technologies, our vitrified saw sharpening wheels are designed to ensure better grinding performance.

Using premium quality abrasives and bonds, our products are intended to lower overall manufacturing and regrinding costs in all forestry and saw markets.

For Saw Sharpening, please take note of the safety instructions, about the storage and use of grinding wheels, available on page 538.

See a small selection of our new range of Saw Sharpening wheels with the revolutionary bond below

NORTON QUANTUM WITH VITRIUM³ 5NQ

REVOLUTIONARY BOND TECHNOLOGY

FEATURES

- Engineered ceramic grain shape and chemistry with new revolutionary bond
- Perfect combination of sharpness and toughness

BEST +++++

INNOVATION

BENEFITS

- Extreme versatility for all precision applications
- Reduced dressing frequency and cost
- High profile accuracy
- Cooler cut and high speed material removal

NORTON QUANTUM 3NQ / 2NQ

FEATURES

- Engineered ceramic grain shape and chemistry with new bond technology
- A perfect blend between sharpness (free cutting) and toughness (life)

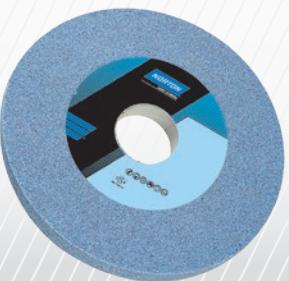

BEST +++++

BENEFITS

- Versatile in all low, medium and high force applications
- 30% to 100% higher metal removal rate
- >15% lower threshold power

SG 3SG

FEATURES

- High concentration of SG ceramic aluminum oxide abrasive
- Unique, self sharpening, microcrystalline structure

BENEFITS

- Very good cutting capability
- High removal rate & extended wheel life
- Suitable for very hard steels

REVOLUTIONARY BOND TECHNOLOGY

FEATURES

- High purity white aluminium oxide abrasives with enhanced bond adhesion
- High friability abrasive

BENEFITS

- Even cooler & burn free cutting
- Extended wheel life
- Improved profile accuracy
- Ideal for heat sensitive applications with light to moderate feed rates

VITRIUM 

SG SGB

FEATURES

- Medium concentration of SG ceramic aluminum oxide
- Harder & sharper than conventional abrasive grains

BENEFITS

- Good cutting capability
- Suitable for low to medium power machines
- Very versatile on a wide variety of steels

GOOD +++

FEATURES

- High purity white aluminium oxide abrasive
- Friable

BENEFITS

- Cool & burn free cutting
- Ideal for heat-sensitive applications with light to moderate feed rates

86A

FEATURES

- Highly refined pink aluminium oxide abrasive
- Tougher abrasive than pure white aluminium oxide
- Contains a small portion of chromium oxide

BENEFITS

- Very versatile
- Reduced dress frequency

19A

FEATURES

- A blend of A & 38A abrasives
- Primarily used in saw grinding applications

BENEFITS

- Very versatile. For use on a wide variety of steels
- Good yield, good removal rate
- Good balance between cut rate & form holding ability

39C

FEATURES

- Highest purity green silicon carbide abrasive
- Harder & more friable than aluminium oxide abrasive

BENEFITS

- Ideal for precision grinding & sharpening applications on metal carbide

NORTON QUANTUM WITH VITRIUM³ 5NQ

BEST INNOVATION

REVOLUTIONARY BOND TECHNOLOGY

FEATURES

- Engineered ceramic grain shape and chemistry with new revolutionary bond
- Perfect combination of sharpness and toughness

BENEFITS

- Extreme versatility for all precision applications
- Reduced dressing frequency and cost
- High profile accuracy
- Cooler cut and high speed material removal

NORTON
SAINT-GOBAIN

QUANTUM
VITRIUM³

NORTON QUANTUM 5NQ / 3NQ / 2NQ

BEST +++++

FEATURES

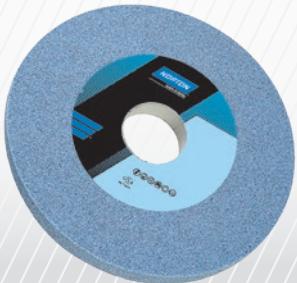

- Engineered ceramic grain shape and chemistry with new bond technology
- A perfect blend between sharpness (free cutting) and toughness (life)

BENEFITS

- Versatile in all low, medium and high force applications
- 30% to 100% higher metal removal rate
- >15% lower threshold power

SG 5SG

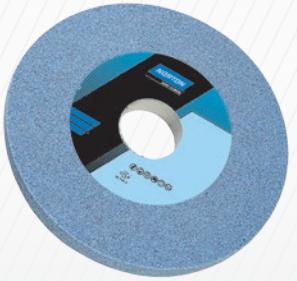

FEATURES

- Very high concentration of SG ceramic aluminium oxide abrasive

BENEFITS

- Ultimate cutting capability
- High removal rate & extended wheel life
- Perfect for technical applications where grinding parameters can be adjusted to optimise performance

SG 3SG

FEATURES

- High concentration of SG ceramic aluminium oxide abrasive
- Unique, self sharpening, microcrystalline structure

BENEFITS

- Very good cutting capability
- High removal rate & extended wheel life
- Suitable for very hard steels

VITRIUM

BENEFITS

- Even Cooler & burn free cutting
- Extended wheel life
- Improved profile accuracy
- Ideal for heat sensitive applications with light to moderate feed rates

SG SGA / SGB

FEATURES

- Medium concentration of SG ceramic aluminum oxide
- Harder & sharper than conventional abrasive grains

BENEFITS

- Good cutting capability
- Suitable for low to medium power machines
- Very versatile on a wide variety of steels

VORTEX IPA

FEATURES

- High performance engineered alumina grain
- High porosity & permeability for maximum coolant diffusion
- Optimal grain spacing for improved chip clearance & reduced friction

BENEFITS

- Very high metal removal rates, resulting in reduced cycle times
- Improved part quality thanks to reduced heat generation
- Increase wheel life
- Consistent grinding performance
- Extremely cool cutting action promoting burn free results

38A

FEATURES

- High purity white aluminium oxide abrasive
- Friable

GOOD

86A

FEATURES

- Highly refined pink aluminium oxide abrasive
- Tougher abrasive than pure white aluminium oxide
- Contains a small portion of chromium oxide

EXTERNAL CYLINDRICAL GRINDING (OD)

Norton's leading technology, provides you with the best precision, form holding vitrified wheels to maximize productivity, increase grinding efficiency and improve part quality in all your external cylindrical grinding operations.

For OD Grinding, please take note of the safety instructions, about the storage and use of grinding wheels, available on page 538.

NORTON QUANTUM WITH VITRIUM³ 5NQ

BEST +++++

INNOVATION

REVOLUTIONARY BOND TECHNOLOGY

FEATURES

- Engineered ceramic grain shape and chemistry with new revolutionary bond
- Perfect combination of sharpness and toughness

BENEFITS

- Extreme versatility for all precision applications
- Reduced dressing frequency and cost
- High profile accuracy
- Cooler cut and high speed material removal

NORTON
SAINT-GOBAIN

QUANTUM™
VITRIUM³

NORTON QUANTUM 3NQ / 2NQ

BEST +++++

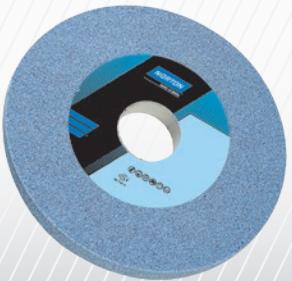

FEATURES

- Engineered ceramic grain shape and chemistry with new bond technology
- A perfect blend between sharpness (free cutting) and toughness (life)

BENEFITS

- Versatile in all low, medium and high force applications
- 30% to 100% higher metal removal rate
- >15% lower threshold power

SG 3SG

FEATURES

- High concentration of SG ceramic aluminum oxide abrasive
- Unique, self sharpening, microcrystalline structure

BENEFITS

- Very good cutting capability
- High removal rate & extended wheel life
- Suitable for very hard steels

38A WITH VITRIUM³

BETTER +++

REVOLUTIONARY BOND TECHNOLOGY

FEATURES

- High purity white aluminium oxide abrasives with enhanced bond adhesion
- High friability abrasive

BENEFITS

- Even cooler & burn free cutting
- Extended wheel life
- Improved profile accuracy
- Ideal for heat sensitive applications with light to moderate feed rates

LINK TO WEBSITE
AND ANIMATION

BONDED
ABRASIVES

SUPER
ABRASIVES

DIAMOND
TOOLS

CLEANING,
POLISHING
& MASKING

PERSONAL
PROTECTION
EQUIPMENT

TECHNICAL
INFORMATION

SG SGA / SGB**FEATURES**

- Medium concentration of SG ceramic aluminum oxide
- Harder & sharper than conventional abrasive grains

BENEFITS

- Good cutting capability
- Suitable for low to medium power machines
- Very versatile on a wide variety of steels

38A**FEATURES**

- High purity white aluminium oxide abrasive
- Friable

GOOD +++**BENEFITS**

- Cool & burn free cutting
- Ideal for heat-sensitive applications with light to moderate feed rates

19A**FEATURES**

- A blend of A & 38A abrasives
- Primarily used in saw grinding applications

BENEFITS

- Very versatile. For use on a wide variety of steels
- Good yield, good removal rate
- Good balance between cut rate & form holding ability

39C**FEATURES**

- Highest purity green silicon carbide abrasive
- Harder & more friable than aluminium oxide abrasive

BENEFITS

- Ideal for precision grinding & sharpening applications on metal carbide

37C

FEATURES

- High purity black silicon carbide abrasive
- Harder & more friable than aluminum oxide abrasive

BENEFITS

- Suitable for roughing operations in coarse grit & resinoid wheels
- Ideal for grinding & sharpening applications on metal carbide & non-ferrous metals

INTERNAL CYLINDRICAL GRINDING (ID)

Fruit of historical and technical expertise, Norton's bond and abrasive grain formulations are optimized to best suit the technical request of your ID grinding operations: Perfect geometry (roundness, conicity of the part) and good surface finish.

For ID Grinding, please take note of the safety instructions, about the storage and use of grinding wheels, available on page 538.

NORTON QUANTUM WITH VITRIUM³ 5NQ

BEST INNOVATION

REVOLUTIONARY BOND TECHNOLOGY

FEATURES

- Engineered ceramic grain shape and chemistry with new revolutionary bond
- Perfect combination of sharpness and toughness

BENEFITS

- Extreme versatility for all precision applications
- Reduced dressing frequency and cost
- High profile accuracy
- Cooler cut and high speed material removal

NORTON
SAINT-GOBAIN **QUANTUM™**
VITRIUM³

NORTON QUANTUM 5NQ / 3NQ

BEST +++++

FEATURES

- Engineered ceramic grain shape and chemistry with new bond technology
- A perfect blend between sharpness (free cutting) and toughness (life)

BENEFITS

- Versatile in all low, medium and high force applications
- 30% to 100% higher metal removal rate
- >15% lower threshold power

SG 5SG

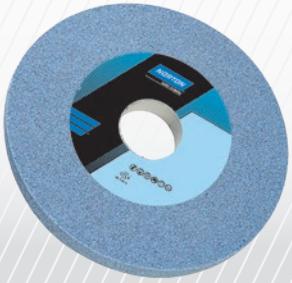

FEATURES

- Very high concentration of SG ceramic aluminium oxide abrasive

BENEFITS

- Ultimate cutting capability
- High removal rate & extended wheel life
- Perfect for technical applications where grinding parameters can be adjusted to optimise performance

SG 3SG

FEATURES

- High concentration of SG ceramic aluminium oxide abrasive
- Unique, self sharpening, microcrystalline structure

BENEFITS

- Very good cutting capability
- High removal rate & extended wheel life
- Suitable for very hard steels

38A WITH VITRIUM³

REVOLUTIONARY BOND TECHNOLOGY

BETTER +++

FEATURES

- High purity white aluminium oxide abrasives with enhanced bond adhesion
- High friability abrasive

BENEFITS

- Even cooler & burn free cutting
- Extended wheel life
- Improved profile accuracy
- Ideal for heat sensitive applications with light to moderate feed rates

BONDED
ABRASIVES

SUPER
ABRASIVES

DIAMOND
TOOLS

CLEANING,
POLISHING
& MASKING

PERSONAL
PROTECTION
EQUIPMENT

TECHNICAL
INFORMATION

SG SGB**FEATURES**

- Medium concentration of SG ceramic aluminum oxide
- Harder & sharper than conventional abrasive grains

BENEFITS

- Good cutting capability
- Suitable for low to medium power machines
- Very versatile on a wide variety of steels

38A**FEATURES**

- High purity white aluminium oxide abrasive
- Friable

GOOD +++**BENEFITS**

- Cool & burn free cutting
- Ideal for heat-sensitive applications with light to moderate feed rates

39C**FEATURES**

- Highest purity green silicon carbide abrasive
- Harder & more friable than aluminium oxide abrasive

BENEFITS

- Ideal for precision grinding & sharpening applications on metal carbide

37C**FEATURES**

- High purity black silicon carbide abrasive
- Harder & more friable than aluminum oxide abrasive

BENEFITS

- Suitable for roughing operations in coarse grit & resinoid wheels
- Ideal for grinding & sharpening applications on metal carbide & non-ferrous metals

BENCH AND PEDESTRAL WHEELS

The Norton bench and pedestal wheels line consists of all wheel diameters and arbor sizes, abrasive types and grit sizes. Our offering answers all metal removal, deburring, shaping and sharpening needs: white aluminum oxide for high-speed tool steels, brown aluminum oxide for carbon steel, and silicon carbide for non-ferrous metals and carbide tooling.

For bench and pedestal grinding, please take note of the safety instructions, about the storage and use of grinding wheels, available on page 538.

STARLINE BROWN ALUMINIUM OXIDE

For steel removal, shaping and deburring.

FEATURES

- High quality aluminium oxide in a premium vitrified bond
- Precision engineered grit sizes and hardness

GOOD

BENEFITS

- Maximised cut rate finish and wheel life

STARLINE WHITE ALUMINIUM OXIDE

GOOD 

For light material removal and sharpening of high speed tool steels.

FEATURES

- White aluminium oxide in a premium vitrified bond
- Precision engineered grit sizes and hardness

BENEFITS

- Maximised cut rate and cool grinding action on hardened or high-speed tool steels

STARLINE GREEN SILICON CARBIDE

For all general purpose bench and pedestal applications on non-ferrous materials and carbide tools.

FEATURES

- Sharp green silicon carbide
- Precision engineered grit sizes and hardness

BENEFITS

- Maximised cut rate and finish on non-ferrous metals

A

FEATURES

- Regular brown aluminium oxide abrasive
- Unique, self sharpening, microcrystalline structure

BENEFITS

- Very tough, suitable for grinding most types of steel & soft iron
- Good cost/performance compromise
- Hard wearing wheels for general purpose cylindrical off-hand bench & pedestal grinding applications

39C

FEATURES

- Highest purity green silicon carbide abrasive
- Harder & more friable than aluminium oxide abrasive

BENEFITS

- Ideal for precision grinding & sharpening applications on metal carbide

38A

FEATURES

- High purity white aluminium oxide abrasive
- Friable

BENEFITS

- Cool & burn free cutting
- Ideal for heat-sensitive applications with light to moderate feed rates

STARLINE - BROWN ALUMINIUM OXIDE

MOUNTED POINTS & WHEELS

Norton Quantum (NQ) vitrified mounted points are the best, versatile choice for high volume Foundry and Aerospace operations. The unique, engineered ceramic grain shape in combination with the chemistry of the proven bond technology can provide 33%+ longer life versus competitive ceramic products with 30%+ higher metal removal rates. With minimal loading and heat build-up they are ideal for grinding Inconel and similar alloy turbine blade components, e.g. to attain final geometry and to create a uniform finish. Less pressure is needed to get optimum performance so... Let the Norton Quantum grain do the work!

APPLICATIONS & MARKETS

- Deburring
- Blending
- Finishing

TECHNICAL INFORMATION

NORTON QUANTUM NQ

FEATURES

- Unique, engineered ceramic grain shape and chemistry with proven bond technology

BEST +++++

BENEFITS

- Ideal for high-volume foundry operations – grinding Inconel and similar alloy turbine blade components
- Minimal loading and heat build-up
- 33%+ longer life vs. competitive ceramic products
- 30%+ higher metal removal rates
- Versatile, optimized for all low, medium and high force applications
- Exceptional productivity and life

86A

FEATURES

- Highly refined pink aluminium oxide abrasive
- Tougher than pure white aluminium oxide abrasive
- Good profile holding
- Contains a small portion of chromium oxide abrasive

GOOD +++

BENEFITS

- Very versatile
- Reduced dress frequency
- Better part geometry

SPEC CHECK

- Use 36 grit & coarser for rough grinding
- Use 60 grit for imparting fine finishes or when grinding on narrow surfaces

DRESSING STICKS

Regular use of properly selected dressing sticks will help you achieve maximum performance from your vitrified wheels.

APPLICATIONS & MARKETS

- Truing, cleaning & dressing Diamond, CBN & conventional abrasive wheels

NORBIDE

BEST

FEATURES

- Manufactured from sintered boron carbide
- Extremely hard & very dense

BENEFITS

- Excellent chemical & wear resistance
- Long product life, reduced maintenance & less downtime
- Suitable also for dressing tool & cutter wheels 200mm & smaller, especially cup & dish shapes

39C

BETTER

FEATURES

- Highest purity green silicon carbide abrasive
- Harder & more friable than aluminium oxide abrasive

BENEFITS

- Ideal for dressing conventional vitrified grinding wheels
- Outperforms 37C for better cutting efficiency & longer life

CRYSTOLON

FEATURES

- Premium silicon carbide abrasive
- Pre-filled with oil

GOOD

BENEFITS

- Fast cutting stone; ideal for general sharpening of cutting tools
- Fast stock removal for quick edge shaping with minimal loading
- Saves time by eliminating the need for pre-soaking prior to use

INDIA

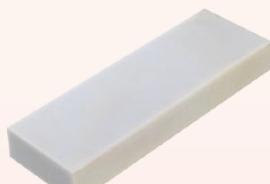

FEATURES

- Smooth cutting aluminium oxide abrasive
- Norton's trademark for a fine finish
- Pre-filled with oil

BENEFITS

- Long lasting cutting edge
- Ideal for cleaning, deburring & good quality finishes
- Saves time by eliminating the need for pre-soaking prior to use

ARKANSAS

FEATURES

- Natural premium Novaculite quarried in Arkansas & available in soft & hard
- Dense construction

BENEFITS

- Sharpest possible razor edges
- Near mirror finishes
- Use for finer honing after India stone
- Absorbs oil at a slower rate, hence does not require pre-filling

ORGANIC CUT-OFF WHEELS

Reinforced cut-off wheels contain fiberglass to increase mechanical resistance when in use. The reinforcements increase the lateral stress capacity, resulting in higher resistance to breakage. Non-reinforced cut-off wheels are only designed for use on fixed base machines, where the work is securely clamped, the wheel is adequately guarded and operating on a controlled cutting plane. They are suitable for use in dry or wet conditions, depending on bond type.

APPLICATIONS & MARKETS

REINFORCED CUT-OFF WHEELS

- Foundry – all steel types
- Aerospace
- Automotive

NON-REINFORCED CUT-OFF WHEELS

- Saw sharpening
- Tool cut-off
- Lab cut-off
- Industrial cut-off

NORZON WITH FOUNDRY X TECHNOLOGY

TYPE 41

Norzon cut-off wheels with new Foundry X bond technology increase cut rate and wheel life in all cut-off applications on a wide range of tough materials.

FEATURES

- Foundry X bond technology
- Latest generation of Norzon grain with finer structure and sharper shape
- Excellent micro-fracturing properties

BENEFITS

- Greater heat resistance
- Longer wheel life
- Lower total abrasive cost
- Improved cut rate (removes material faster)
- Reduced cycle time
- Lower specific cutting energy relative to previous technology

INFORMATION

TOROS 57A**TYPE 41****FEATURES**

- Semi-friable aluminium oxide abrasive
- Less tough than type A abrasive but offers better cutting quality
- Pointed shape

GOOD +++**TOROS****BENEFITS**

- Cool & burn free cutting
- Ideal for heat-sensitive applications with light to moderate feed rates
- Suitable for all steels
- Good compromise between cut quality & wheel life
- Very versatile: suitable for all steels

TOROS 23A**TYPE 41****FEATURES**

- An abrasive blend of semi-friable 57A aluminium oxide & white monocrystalline 32A aluminium oxide

BENEFITS

- Cool & burn free cutting
- Suitable for all steels
- Improved metal removal rate compared to 57A pure semifriable aluminium oxide abrasive

NORTON WITH FOUNDRY X TECHNOLOGY**TYPE 41****TYPE 42**

Norton cut-off wheels with new Foundry X bond technology increase cut rate and wheel life in all cut-off applications on a wide range of tough materials.

FEATURES

- Foundry X bond technology
- High performance aluminium oxide or silicon carbide grain
- Good choice for low to medium power machines

BENEFITS

- Greater heat resistance
- Longer wheel life
- Lower total abrasive cost
- Consistent performance range on standard applications
- Stable surface cut quality

SPEC CHECK

- B24 New generation bond used on silicon carbide cut-off wheels that gives the best performance & the ultimate cut quality on non-ferrous metals in wet conditions
- B25 Standard multi-purpose bond that offers durability & freeness of cut in a wide variety of materials & applications. Can also be used in wet cutting on softer grades
- B26 New generation bond used on aluminium oxide cut-off wheels that gives the best performance & the ultimate cut quality on ferrous metals in wet conditions
- BF1 Specific bond ensuring the best quality of cut in dry or wet conditions
- BF3 New generation bond assuring the best wheel life in dry cutting operations; versatile & long wheel life. Ideal for heavy duty operations
- B65 Traditional bond gives good performance & long wheel life in dry cutting conditions.
- BFX Engineered Foundry X bond to increase cut rate and wheel life in all your cut-off applications on a wide range of tough materials.

REINFORCEMENTS

The main purpose of the fibreglass reinforcement in cut-off wheels is safety. Reinforcements also permit wheels to withstand high rotational speed & make them more flexible. Reinforcements can be external or internal, half or full diameter. Reinforcements impact the cutting profile, affecting both the straightness & quality of cut.

Reduction rings are available upon request to adapt the product to different spindle sizes.

SPEC CHECK

- Non-reinforced cut-off wheels are designed for use on "fixed base" machines where the work is securely clamped, guarded, & where the wheel operates on a controlled cutting plane
- Run the cut-off machine at the highest possible speed marked on the wheel
- Long life wheels should be used on a cut-off machine with 1 horsepower for every 25mm wheel diameter. With a less powerful machine, we recommend starting with a Free Cut specification.

ORGANIC SNAGGING WHEELS & CUPS

Norton offer a range of products for portable snagging foundry applications. Type 01 straight wheels are used on portable machine and Type 06 and 11 cup wheels on vertical grinders. Since finish tolerances are not usually critical, coarse, durable wheels are used with grit sizes ranging from 16 to 24.

APPLICATIONS & MARKETS

- Foundries
- Welding shops
- Steel mills
- Forge shops

ZF7A/ZF7C

BEST +++++

TYPE 01

FEATURES

- Special design of abrasive blends
- High durability & versatility

BENEFITS

- Very good compromise between wheel life & metal removal rate
- ZF7A is premium product for all steels
- ZF7C is premium product for all non-ferrous metals

A/AZ

GOOD +++

TYPE 06

TYPE 11

FEATURES

- Tougher than pure white aluminium oxide abrasive
- General purpose abrasive ideal for most operations

BENEFITS

- Long wheel life, limited metal removal rate
- AZ is a blend of aluminium oxide & zirconia
- Good for cutting medium to soft steels
- Suitable price/performance position
- First choice for less technical applications

INFORMATION

C

TYPE 11

FEATURES

- Low purity black silicon carbide abrasive
- Harder & more friable than aluminium type abrasives

BENEFITS

- Suitable for roughing operations in coarse grit & resinoid wheels
- Ideal for grinding & sharpening applications on metal carbide & non-ferrous metals
- Standard alternative, first choice if no technical specific requirement
