Function (Details $\Rightarrow$ Pages 8 and 9)

Copy function	The settings of the master pressure switch can be copied to the slave pressure switches.
Auto-preset function	This function is to calculate a rough set value automatically based on the on-going operation.
Precision indicator setting function	The scattering of the indicated value can be eliminated.
Peak display function	Can retain the maximum pressure value displayed during measurement.
Bottom display function	Can retain the minimum pressure value displayed during measurement.
Key lock function (Selectable secret code)	Key operation can be locked to prevent any incorrect function of the operation switch.
Zero-clear function	The pressure display can be set at zero when the pressure is open to the atmosphere.
Anti-chattering function	Prevents possible malfunction due to sudden fluctuations in the primary pressure by adjusting the response time.
Display unit switching function	Can convert the display value.
Power-saving mode	Reduces power consumption.
Display resolution conversion function	Changes the display resolution from the default value 1000 to 100. The flickering on the display can be eliminated.
kPa $\Leftrightarrow$ MPa conversion function	The unit can be changed between kPa and MPa.
