

HRC Coupling Flanges (Elements)

HRC Elements are part of a coupling assembly, where two respective metal flanges, (one on each side) and one rubber element are used to couple two separate shafts on the same axis.

HRC Elements are manufactured from NBR/SBR rubber
 Operating Temperature of -40/+100°C (inclusive of rubber Element)
 HRC Elements have a shore hardness of 90-92 Shore

HRC Coupling Size range
HRC 70 Flanges
HRC 90 Flanges
HRC 110 Flanges
HRC 130 Flanges
HRC 150 Flanges
HRC 180 Flanges
HRC 230 Flanges
HRC 280 Flanges
