

DEGREASING CLEANER C30

Item #	EAN	Product
843463	3660338062018	C30

Description

Powerful emulsifying degreaser for organic and mineral greases for manual or mechanical cleaning. pH 13.5. Can be applied to all washable surfaces: floors (tiles, plastic coverings), walls, enamelled surfaces, industrial kitchens, food industry, public works equipment, etc. Totally soluble in water. Liquid appearance, slight odour. Read carefully the instructions for use.

Chemical nature

- Sodium hydroxide
- Sodium alkali salt
- Oxygenated solvent
- Dispersing agent
- Non-ionic surfactants
- Anionic surfactant
- Antifoaming agent

How to use

Can be used manually by brushing, soaking, flat washing and also automatically by auto scrubber and high pressure cleaner, always diluted in lukewarm water preferably:

- 1 to 5% - For routine maintenance.
- 3 to 10% - Cleaning of all washable greasy surfaces, including those that may come into contact with foodstuffs and for the food industry.
- 5 to 10% - Cleaning of garage and cement floors, mechanical parts, construction equipment and mechanical workshops.

To be used diluted to a maximum of 2%, in a self-washing machine.

Physical and chemical characteristics

- Appearance: Liquid
- Colour: milky yellow
- Odour: alkaline
- pH in pure state: > 12
- Density at 20°C: 1.040 ± 0.005
- Solubility: total in water

Precautions for use

Do not mix with other products. Close the package after use. Reproduce the labelling if decanting into another container. Observe the precautions of the regulatory labelling. Do not use on aluminium, zinc, tin, lead, copper, light alloys and glass.

Storage & packaging

- Store the product in its original packaging, away from light and at a temperature between 5°C and 30°C
- Carton of 2x5L.
