### PRODUCT DEFINITION

|                                                                 |       |
|-----------------------------------------------------------------|-------|
| <b>Brand</b>                                                    | SNR   |
| <b>d1 - Sleeve bore diameter</b>                                | 50 mm |
| <b>d - Internal diameter</b>                                    | 55 mm |
| <b>d2 - Outer diameter of locknut</b>                           | 75 mm |
| <b>B1 - Sleeve length</b>                                       | 59 mm |
| <b>B2 - Distance between the bearing face and nut rear face</b> | 12 mm |
| <b>G - Thread designation</b>                                   | M55X2 |

## PRODUCT DEFINITION

|             |         |
|-------------|---------|
| <b>Mass</b> | 0,42 kg |
|-------------|---------|

## TECHNICAL CHARACTERISTICS

|                           |             |
|---------------------------|-------------|
| <b>Associated bearing</b> | 22311, 2311 |
|---------------------------|-------------|

|             |              |
|-------------|--------------|
| <b>Bore</b> | Tapered 1:12 |
|-------------|--------------|
