Description

Ultra-lightweight and comfortable safety glasses with a modern, wraparound design.
Flat and thin temples. Protects against UVA and UVB rays, filtering 99.99% of the spectrum.
Weight: 16 g

Lens colour: Colourless
Temple colour: Colourless
Lens : Polycarbonate

Key Advantages

Ultra-lightweight model to reduce fatigue at work.
Anti-scratch and anti-fog coatings (except for model 888388).

Applications

Suitable for all types of industries, both indoor and outdoor environments, including construction, maintenance, engineering, offshore work, warehousing, etc.

Features

Lens curvature: 10
Lens thickness: 2 mm
FT Protection: Against low-energy impacts from high-speed particles at extreme temperatures (point 7.34 of EN166:2001). This corresponds to the impact of a 6 mm steel ball with a minimum mass of 0.86 g launched at 45 m/s.
Lenses : 2C-1.2 G 1 FT CE
Frame : EN166 FT CE

Usage & Storage Precautions

Clean with warm water and dry using a soft, dry, lint-free, and non-abrasive cloth.
When not in use, do not leave the glasses outside their packaging or transport them unprotected alongside other items such as tools or metal objects.

Standards & Certifications

EN166 : 2001

Packaging

- Individually packed / 10 pairs per box / 300 pairs per carton
