Option

Symbol	Description
Nil	—
1 ⁽²⁾	0.02 to 0.2 MPa setting
N	Non-relieving type
Z ⁽³⁾	Name plate and pressure gauge in imperial units (PSI)

* When more than one specification is required, indicate in ascending alphanumeric order.

Note 2) Adjusting spring and pressure gauge (full-span 0.3 MPa) are different from those for the standard specification.

Outlet pressure may increase by 0.2 MPa or more.

Note 3) For thread type NPT.

This product is for overseas use only according to the new Measurement Law. (The SI unit type is provided for use in Japan.)

* Mounting angles other than 45°, 135°, 225° and 315° are available through the Made to Order (page 29).

* Possible to change to the optional mounting angles.

For details, refer to the back of page 6, "Procedure for replacing or changing the mounting angle of a pressure gauge"

⚠ Specific Product Precautions

Be sure to read before handling.
Refer to the back of pages 1
through to 5 for Safety Instructions
and Precautions.

Mounting and Adjustment

⚠ Warning

- 1 Set the regulator while verifying the displayed values of the inlet and outlet pressure gauges. Turning the regulator handle excessively can cause damage to the internal parts.
2. Do not use tools on the pressure regulator handle as this may cause damage. It must be operated manually.

⚠ Caution

- 1 Be sure to unlock the handle before adjusting the pressure and lock it after setting the pressure.
Failure to follow this procedure can cause damage to the handle and the outlet pressure may fluctuate.
 - Pull the pressure regulator handle to unlock. (You can visually verify this with the “orange mark” that appears in the gap.)
 - Push the pressure regulator handle to lock. When the handle is not easily locked, turn it left and right a little and then push it (when the handle is locked, the “orange mark” i.e., the gap will disappear).

2. When using the regulator between a solenoid valve and an actuator, check the pressure gauge periodically.
