V500 Set Universal Ball Valve Lockout Device with Safelex™ C506 Cable Lockout Device

Item number: 87152 | EAN: 4003318871528

The universal valve lock V500 fits on every ball valve handle and secures it against unintentional operation.

Operation and use

- To secure valves against unintentional restart in case of maintenance works
- Locking ball valve handles by attaching an additional cable lockout device (not included in the delivery)
- Securing the OFF position by connecting to a counterpoint
- For all sizes and shapes of ball valve handles thanks to generous, adjustable clamping area

Technology and features

- Large, stable metal housing
- Ergonomically shaped rotary handle for quick adjustment
- Generous adjusting range
- Large, specially shaped contact areas for optimum grip at the valve handle
- Metallic and rubberized clamping areas for optimum grip on different surfaces
- One insertion point for threading through a wire lock/cable lockout device
- With embedded warning "Danger - Locked out"
