

- > **Port size: G1/8 & G1/4**
- > **Standard manual override with detend**
- > **Compact design**
- > **Common exhaust line**

Medium:

Compressed air, filtered lubricated or non lubricated

Operation:

Solenoid operated, indirectly actuated seat valves

Operating pressure:

max. 10 bar (145 psi)

Nominal size:

4 and 7 mm

Port size:

G1/8, G1/4

Mounting position:

Any, but preferably with solenoid vertical

Flow direction:

Fixed

Ambient/Media temperature:

-10°C ... +60 °C (14° .. +140°F)

Depending on solenoid system
Air supply must be dry enough to avoid ice formation at temperatures below +2°C (+35°F).

If installed in the open protect all connections against the penetration of moisture!

Material:

Housing: Aluminium

Pilot flange : Plastic (PBT)

Seals: NBR

Warning

These products are intended for use in industrial compressed air systems only. Do not use these products where pressures and temperatures can exceed those listed under

»Technical features/data«.

Before using these products with fluids other than those specified, for non-industrial applications, life-support systems or other applications not within published specifications, consult IMI Precision Engineering, Norgren GmbH.

Through misuse, age, or malfunction, components used in fluid power systems can fail in various modes.

The system designer is warned to consider the failure modes of all component parts used in fluid power systems and to provide adequate safeguards to prevent personal injury or damage to equipment in the event of such failure.

System designers must provide a warning to end users in the system instructional manual if protection against a failure mode cannot be adequately provided.

System designers and end users are cautioned to review specific warnings found in instruction sheets packed and shipped with these products.
