

3M™ Hookit™ Soft Abrasive Disc

*A new generation of abrasives
for wood and lacquer sanding*

New

Conformable, longer lasting

3M *Innovation*

3M™ Hookit™ Soft Abrasive Disc

The new Hookit Soft Disc from 3M is designed for wood and lacquer sanding. The soft sponge backing enables this new product to conform to the contours of the workpiece. The Hookit Soft Disc is available in two grades, Fine and Superfine. The Fine grade disc is designed for white wood sanding and the Superfine disc produces excellent results on lacquered parts.

The new Hookit Soft Disc combines the unique Hookit attachment system with the coating technology that produces the 3M Softback Sanding Sponges. A new concept in wood and lacquer sanding.

Benefits

More consistent finish

The Hookit Soft Disc follows the contours of the workpiece

The Hookit Soft Disc adapts to the surface of the workpiece

Saves time and money

- Higher sanding accuracy
- Longer lasting
- Better value for money

Better finish
