Description

Standard pulling hook.

Strong design, high performance and long service life

The end stop protects the hook from slipping off the cross-beam.

Pulling hooks with infinitely variable adjustment on the cross-beam.

Two-arm design for space-saving operation. Mechanical pressure screw.

Milled thread treated with special coating.

Quick change or turning of the pulling jaws by depressing the end stop.

Turning the pulling hooks enables them to be used both internally and externally.

Suitable for pulling asymmetric workpieces.

Spindle head band prevents the wrench from slipping off.

Made in Germany
