

Profile overview

Profile	Description	Additional information → page	Profile data → page
S1S 	Single-lip U-cup profile made of polyurethane; suitable for medium to heavy duty applications	116	122 (metric)
ZBR 	Double-lip U-cup profile made of polyurethane; suitable for medium to heavy duty applications	116	126 (metric and inch)
SIL 	Double-lip U-cup profile made of polyurethane; suitable for low temperatures and light to medium duty applications	117	134 (metric)
PTB 	Polyurethane U-cup profile with incorporated nitrile rubber X-ring, which provides good performance even at low pressure and temperature; suitable for medium duty applications	117	138 (metric and inch)
STD 	Polyurethane U-cup profile with incorporated nitrile rubber X-ring, which provides good performance even at low pressure and temperature; fits narrow housings; suitable for medium duty applications	118	164 (inch)
DZ 	Nitrile rubber primary sealing ring, polyurethane secondary sealing ring; low friction; suitable for medium to heavy duty applications	118	178 (metric and inch)
DZR 	Nitrile rubber primary sealing ring, polyurethane secondary sealing ring, integrated triangular polyamide anti-extrusion ring; improved gap extrusion resistance; suitable for heavy duty applications and extreme pressures	119	184 (metric and inch)

SIL profiles

SIL profiles (→ **fig. 6**) are made of ether-based TPU. They have a double-lip design and a secondary dynamic sealing lip. These seals provide good resistance to hydrolysis (attack from moisture) and good low temperature resilience. SIL profiles are suitable for pressures up to 350 bar (5 075 psi) in light to medium duty applications and are available in metric sizes. Some fit seal housings in accordance with ISO 5597.

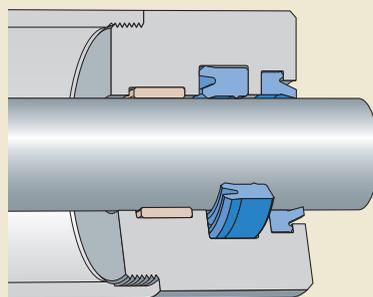

Energized U-cup rod seals

Energized U-cup rod seals incorporate a nitrile rubber (NBR) X-ring in their thermoplastic polyurethane (TPU) U-cup. The X-ring serves as energizer, provides additional sealing force and improves the long-term resilience of the sealing lips. This can be beneficial in applications with low operating pressure or low temperatures.

PTB profiles

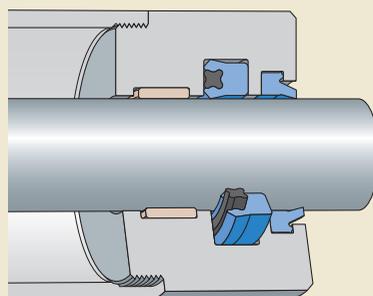

PTB profiles (→ **fig. 7**) are made of LUBRITHANE (TPU). They are suitable for pressures up to 400 bar (5 800 psi) in medium duty applications and are available in metric and inch sizes. Some metric sizes fit seal housings in accordance with ISO 5597.
