

A dramatic, low-key photograph of Thor, the Norse god of thunder, holding his hammer Mjolnir aloft. He is surrounded by bright, crackling lightning bolts against a dark, stormy background. The lighting is primarily from the lightning, creating a high-contrast, ethereal effect. Thor's long, wavy hair and beard are visible, and his expression is one of intense focus or power. The hammer is positioned at the top of the frame, with a bright flash of light emanating from its head.

THOR

SOFT FACED HAMMERS

COPPER HAMMERS

Cast iron head of extra heavy construction fitted with two pure electrolytic copper faces and wood handle.

Ideal for heavy-duty hammering where SAFE blows of maximum weight and impact are required.

SIMILAR HAMMERS ARE AVAILABLE WITH TWO FACES OF ALUMINIUM. (see page 5)

All sizes can be supplied with fibreglass handles – Ref No. 04-308FG etc.
 Sizes 1, 2 & 3 are available with plastic handles – Ref No. 04-310PH etc.

COPPER HIDE HAMMERS

Cast-iron head fitted with one face of pure electrolytic copper, the other of compressed water buffalo hide and fitted with wood handle.

The copper face gives a SAFE but high-impact blow, whilst the hide face gives a firm and resilient blow that will not mark finished work.

AN EXCELLENT DUAL-PURPOSE HAMMER FOR THE AUTOMOTIVE TRADE AND GENERAL INDUSTRIAL APPLICATIONS

All sizes can be supplied with fibreglass handles – Ref No. 03-208FG etc.
 Sizes 1, 2 & 3 are available with plastic handles – Ref No. 03-210PH etc.

HIDE HAMMERS

Cast iron head fitted with two hide faces and wood handle.

Faces are manufactured from genuine water buffalo hides, pressed 3 times and seasoned for many months.

These carefully controlled processes ensure hide hammers that can be depended upon for uniform quality and maximum durability.

SIMILAR HAMMERS ARE AVAILABLE WITH TWO SUPER PLASTIC FACES. (see page5)

SPLIT HEAD HAMMERS

These patented Split Head Hammers allow quick changes of faces and handles thereby minimising downtime.

The cast iron heads have two socket head cap screws for uniform distribution of clamping pressure, improving handle and face retention. Extension collars under the head transfer shock to 40% more handle surface, reducing user fatigue and handle breakage. Unique tapered sockets lock faces and handles securely in place, yet the faces can be quickly loosened and rotated for increased service life and uniform wear.

Replacement handles can be locked into the heads without the need for wedges. A significant advantage of this design is the ability to quickly match the hammer's striking face to the task at hand. By choosing either hide, nylon, or super plastic faces, the hammer can be 'customised' to deliver maximum striking power while minimising damage to costly parts.
