

E1W Glands

Glands packs including up to size M32: 2 glands, 2 galvanised lock nuts, 2 earth tags and 2 earth shrouds.
Size M40 above include: 1 gland, 1 galvanised lock nut, 1 earth tag and 1 earth shroud.

E1W Glands are for use with all types of SWA extruded bedding cable where it is essential to produce IP66 seal on the outer sheath and also produce an IP66 seal on the inner sheath. It provides seals on to both inner and outer sheath of the cable. The gland also supplies mechanical cable retention and electrical continuity via armour termination.

CXT Glands

CXT Glands are for use with all types of screened flexible wire braid (e.g. CY/SY). The cable gland provides an environmental seal on the cable outer sheath for indoor and outdoor use. The cable gland also provides mechanical cable retention and electrical continuity via internal pig-tail termination of the flexible wire braid.

Features

Brass glands.
Up to 50mm entry thread size.
Comply to BS6121.
