D ₂	4,9 mm	
G ₂	M6	for screws to DIN ISO 4762-12.9 Max. tightening torque [MA]: M3 = 1,8 Nm M4 = 5 Nm M5 = 10 Nm M6 = 17 Nm M8 = 41 Nm M10 = 83 Nm M14 = 220 Nm The stated torques represent maximum values for the reliable transmission of forces in vibration-free, quasistatic applications (S0=1). We recommend that the tightening torques of the screw connection to the adjacent construction should be determined at the customer under the specific application conditions and operating conditions, observing the data in VDI Guideline 2230
