

MULTI-X MULTI-MATERIAL DRILL

Description

Multipurpose drill bit. Adapted for drilling most material technologies during maintenance. "Multi-X" technology enables work on most materials (concrete, masonry units, roof tiling, eternit, multilayer materials, ceramic, tiling, wood, plastic, aluminum, plastic sheeting). The carbide insert, with its centring point, allows holes to be made easily. 118° angle insert allows for better transmission when rotary drilling or percussion drilling. The "MULTI-X"'s 4 sided grinding mechanism allows quick penetration of material. Made in France.

Strong points

Versatile

Characteristics

Ref.	EAN	Total length mm	Drilling diameter mm	Length of cut mm	Body material	Type of tail
