## PRODUCT DEFINITION

|                                                              |         |
|--------------------------------------------------------------|---------|
| <b>Brand</b>                                                 | SNR     |
| <b>G - Thread designation</b>                                | M105X2  |
| <b>d2 - Outer diameter of locknut</b>                        | 140 mm  |
| <b>B - Nut width</b>                                         | 18 mm   |
| <b>d1 - Outer diameter of the locking surface of the nut</b> | 126 mm  |
| <b>Chamfer angle of the nut</b>                              | 30 °    |
| <b>b - Notch width</b>                                       | 12 mm   |
| <b>h - Notch depth</b>                                       | 5 mm    |
| <b>Mass</b>                                                  | 0,85 kg |

## TECHNICAL CHARACTERISTICS

|                                                      |      |
|------------------------------------------------------|------|
| <b>Designation of the associated blocking device</b> | MB21 |
|------------------------------------------------------|------|
