

## HOLE SAW ARBOR ACCESSORIES (Continued)

### Pilot Drills

Five replacement pilot drills are available for the complete range of Starrett arbors. Drills are 1/4" in diameter. Four are high speed steel and one is carbide.

### Morse Taper Adaptors

Four adaptors are available. The adaptors enable Starrett arbors to fit machine spindles using Morse tapers.

### Quick Change Connectors

The Quick Change Connectors are an excellent complement to Starrett Hole Saws, allowing a 'quick change' of arbors without adjustment of the drill chuck. The AQC14-38 is compatible with all Cordless Smooth Cut Hole Saws. The AQC14-38 and AQC-14 fit the A1, XA1, A4, A10, XA10, A17-38 and XA17-38. The AQC14-38, AQC-14 and AQC-38 fit the complete Quickshot® Range. They provides a simple, rapid method of changing saws. Simply attach the Quick Change Connector to the chuck of the drill, then attach the shank of the arbor to the connector.

## HOLE SAW COWL KIT and ACCESSORIES

The Starrett Hole Saw Cowl Kit is the perfect accessory for maintaining a safe and clean worksite. The cowl collects dust, swarf and debris generated by sawing and is especially useful on vertical sawing applications. The cowl is compatible with the complete range of Starrett hole saws. This tool removes the need to cover work areas prior to sawing and eliminates extensive clean up when the job is done.

The Starrett Hole Saw Cowl attaches easily to the hole saw assembly. It is compatible with the Quick Change Connector for swift change out. You spend more time on the job and generate no mess. The Starrett Hole Saw Cowl Kit is packaged in a sturdy carrying case.

**KHC1** – Hole Saw Cowl Kit supplied in case

**AHC1** – Cowl Arbor Assembly

**AHC12** – 1/2" (13mm) Snap On Adaptor

**AHC58** – 5/8" (16mm) Snap On Adaptor

**AHC2** – Cowl Cover Only
