

Model: **DURHAM**

Protection Class: **S3 SRC CI ESD**

Article: **RI11374**

EU Regulations: **EN ISO 20345:2011**

DESCRIPTION

Durham is a Pull-Up leather, soft, durable and water-resistant safety boot, perfect for working outdoors and humid environments.

The model is a breathable safety shoe with WingTex air tunnel lining that provides prolonged well-being during work. The Safety shoes are in standard protection S3 CI SRC ESD, with Airtoe® composite toecap to protect the top of the foot. Save & Flex Plus anti-perforation system, totally "Metal-Free", guarantees protection against the risks of perforation and is sewn directly on the sole to ensure 100% protection.

Special protection of the sole against the cold ensures the best microclimate in the shoes, also in the colder situation as the "CI" protection allows a higher internal temperature of the shoe than the external one and is therefore ideal with low temperatures and in humid conditions.

The sole is non-slip, anti-oil, anti-static and anti-abrasion.

The anatomical and self-modelling WOW2 insole guarantees comfort and antibacterial protection. The arch structure in a soft BASF compound distributes the body weight evenly, while the anti-fatigue insert can relieve stress on the feet and legs.

Durham is the leather safety boot model appropriate for gas station attendants, carpenters, bricklayers, general workers, welders, artisans, plumbers, warehouse workers, trucking and logistics, mechanic, tire repairer, house painters, and electricians.

UPPER

Water-resistant Pull-Up leather

LINING
