

### CA200 INSTANT ADHESIVE ACTIVATOR

Item #	EAN	Product
829218	366033848197	CA200

#### Description

Activator for cyanoacrylate adhesives. Can be applied before or after bonding to accelerate polymerisation even in unfavourable environments (dry, cold atmosphere) to fill large gaps.

Made in Germany.

#### Characteristics

- Chemical base:	Organic Accelerator – Propane/Butane
- Colour:	Colourless
- Density (g/cm <sup>3</sup> ):	0,705
- Evaporation time at 20°C:	< 30 sec.
- Duration of activity:	2 min.
- Solvent:	Acetone-Heptane
- Lifespan (Months):	18
- Gross volume	270 mL
- Net volume	200 mL

#### Instructions

Before bonding: apply the SPARTEX activator to the surface and wait for evaporation, then apply SPARTEX Cyanoacrylate Adhesive to the other non-activated surface, quickly assemble the two substrates and allow to cure.

After bonding: only use with a suitable spray system to harden the excess cyanoacrylate. To keep a smooth surface of the bead, spray the activator at approximately 30 cm.

#### Packaging and storage

- Unit
- Carton of 10 aerosols
- Palet of 2070 aérosols
- Store in a cool and dry place. The storage temperature should be between 15.5 and 25 °C, do not refrigerate.
